

How to set a Time Charge on the FOXCloud2.0 App.

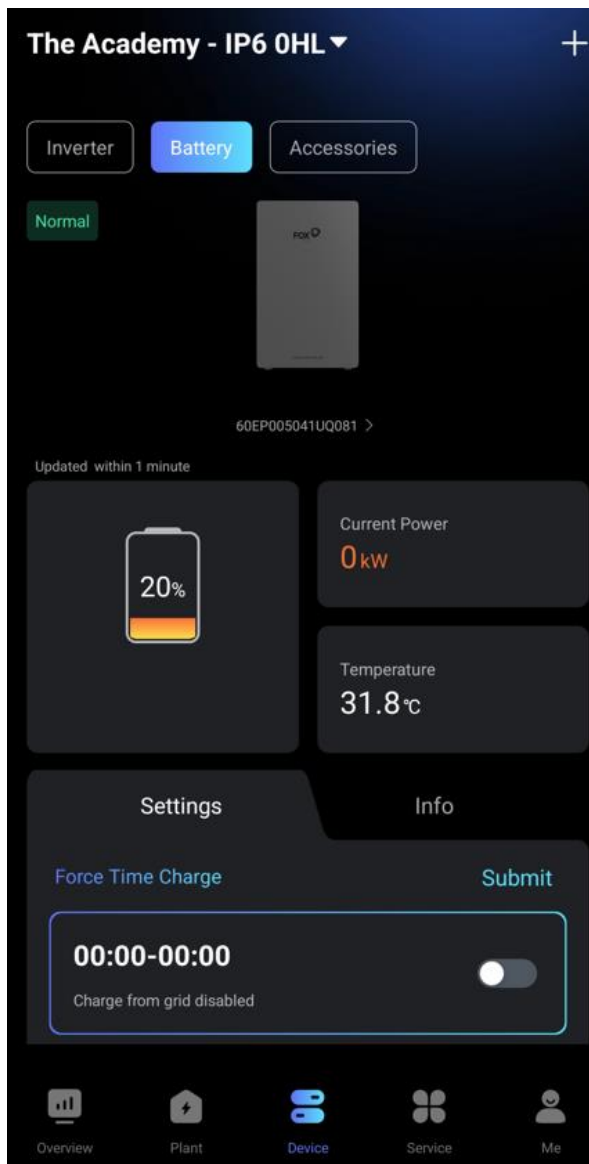

Step 1: Open the FoxCloud2.0 App. This will open onto the overview page as pictured below.

Empowering communities and businesses with **solar energy**. We're dedicated to providing **high-quality, customised installations** that **save money** and **reduce carbon emissions**. As a leading local provider, we **educate, inspire, and support** our customers on their path to a cleaner, **greener future**.

Step 2: Select the Device Tab on the bottom.
This will take you through the following
screen. You will then select Battery on the top.

As a leading local provider, we **educate, inspire, and support** our customers on their path to a cleaner, **greener future**.

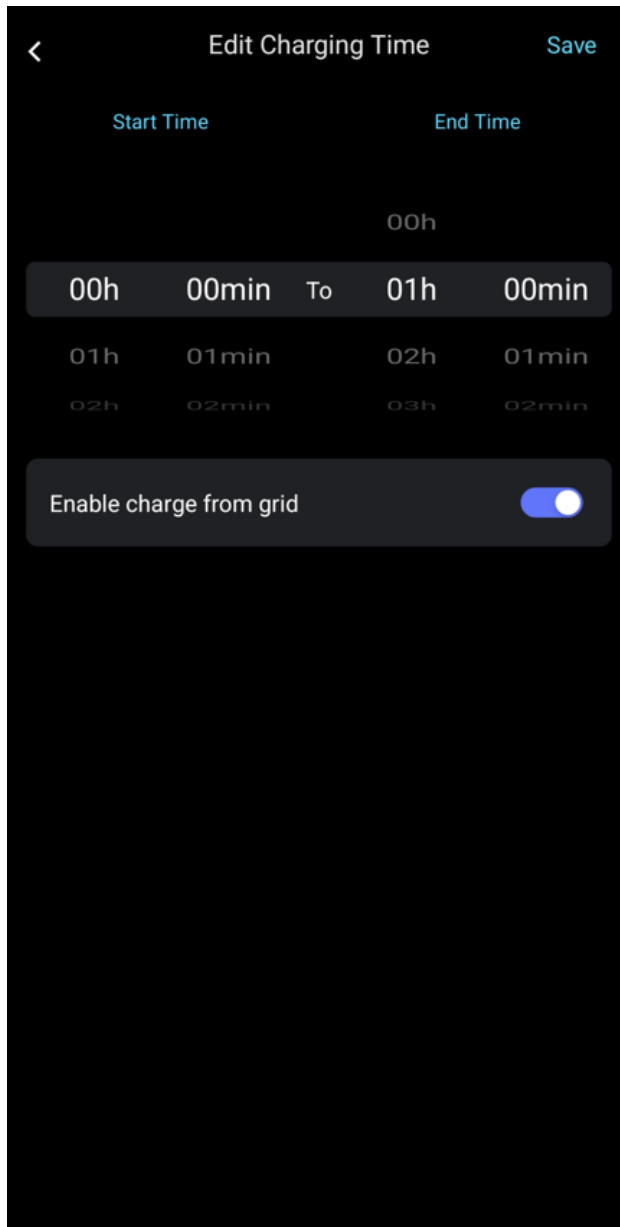

Step 3: Once on the Battery tab, scroll down to the Settings.

You will see a Force Time Charge section.

Click on the box to input your desired times.

As a leading local provider, we **educate, inspire, and support** our customers on their path to a cleaner, **greener future**.

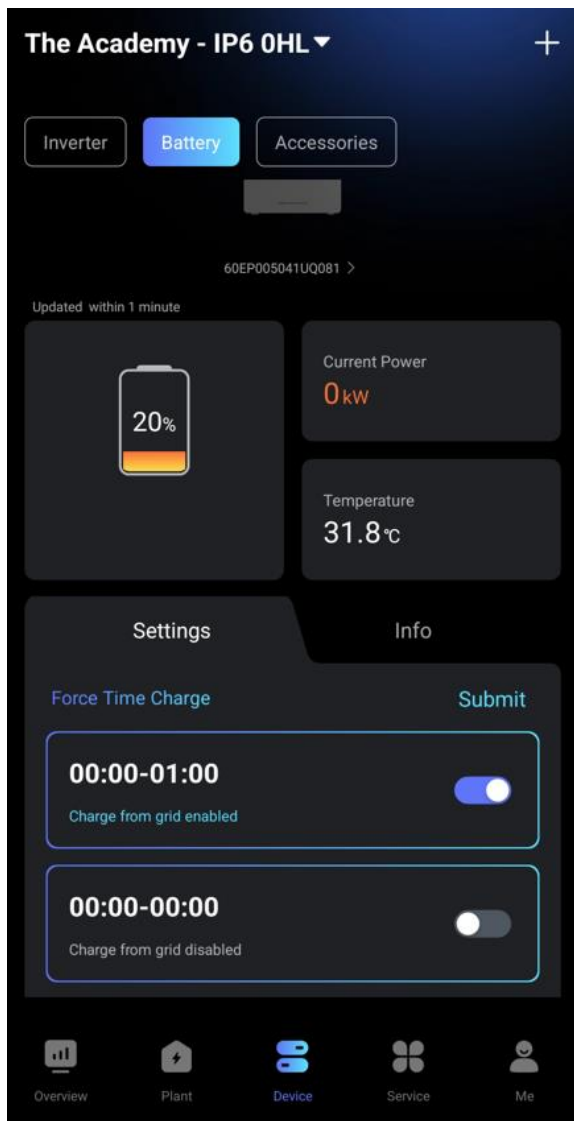

Step 4: You will now be able to toggle through and input your desired times.

You will need to Enable charge from grid.

Once this is completed, you will need to click Save in the top right-hand corner.

It will take you back to the main Battery overview page.

As a leading local provider, we **educate, inspire, and support** our customers on their path to a cleaner, **greener future**.

Step 5: Once back on the Battery overview page, you will need to select the toggle switch as pictured (just below the Submit) button.

Once this is highlighted, you will need to click Submit for the settings to be enabled.

It should bring up a message “Set Succeed”
